

STARPLUS Summary
Features of the new database system called STARPLUS
(State of Arizona Public Use System)

- Allows almost all Arizona Corporation Commission forms to be submitted electronically.
 - The old system allows only 3 types of electronic transactions: submission of corporation annual reports, obtaining name reservations, and obtaining certificates of good standing. The new system has the added capability of allowing almost all Arizona Corporation Commission forms to be submitted electronically.
- Annual report reminder by email - corporations can elect to receive an email reminder to submit their annual report.
- Added capability of searches by county, in addition to the existing capability to search by entity name or file number, or contact name.
- Correspondence approving or rejecting documents can be emailed to customers.
- MOD account customers (frequent filers) will create, monitor, and fund their accounts electronically.

The implementation of the full features of the new system will be conducted in stages. The initial phase is scheduled for April 1, 2013, and the features available will be the same as the old system. Beginning approximately the second week in April, customers will have the added feature of submitting entity formation documents online, for example, articles of organization for LLCs can be electronically submitted. Beginning approximately May 1, 2013, the full feature of electronic submission for almost all other Arizona Corporation Commission forms will be available.
